## **Resource Conservation and Recovery Act Permit Modification Second Notice**

Title: DOE makes request to add alternate methods for radionuclide analysis

On February 7, 2005, the Department of Energy (DOE) at the Savannah River Site requested from the South Carolina Department of Health and Environmental Control (SCDHEC) a Class 2 permit modification to add alternate test methods for the analysis of a number of radionuclides. At that time, we sent out a public notice of our request.

As of this date, SCDHEC has not made a decision on this request. The purpose of this second notice is to inform you that if SCDHEC does not approve or deny this request by April 3, 2006, then SRS will be authorized to use these alternate methods for radionuclide analysis as described in the permit modification for the life of the permit [reference South Carolina Hazardous Waste Management Regulations R.61-79.270.42(b)(6)].

For additional information, contact Jim Moore, Washington Savannah River Company, Savannah River Site, 730-1B, Aiken, SC 29808. If you have any written comments, please send them to H. J. Porter, Assistant Director, Division of Waste Management, South Carolina Department of Health and Environmental Control, 2600 Bull Street, Columbia, SC 29201-1708.
